

Quick Setup Guide – TEAC HD-B6T Digital Terrestrial Receiver

Step 1 – Connect your digital receiver

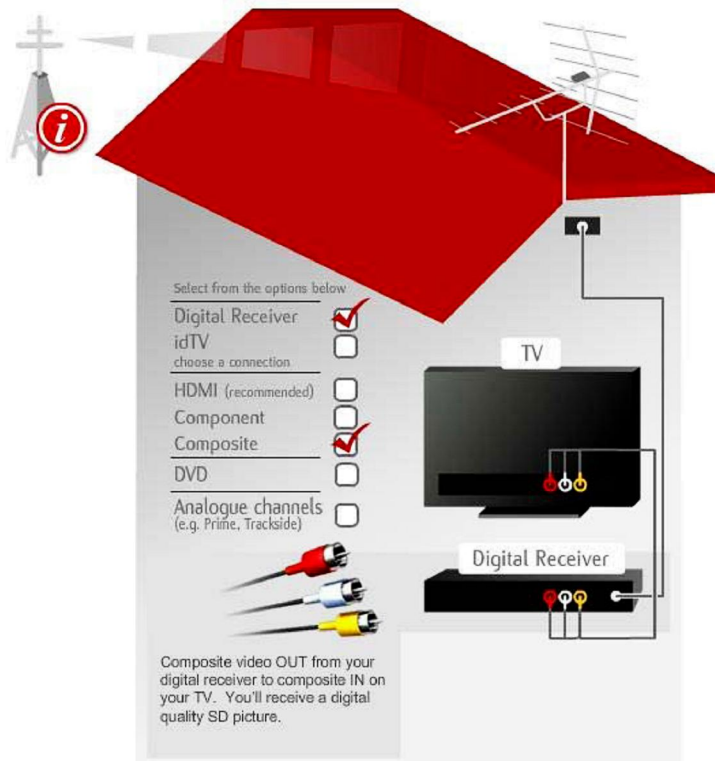

After unpacking your digital receiver, connect as shown in the diagram below.

Option 1: HDMI

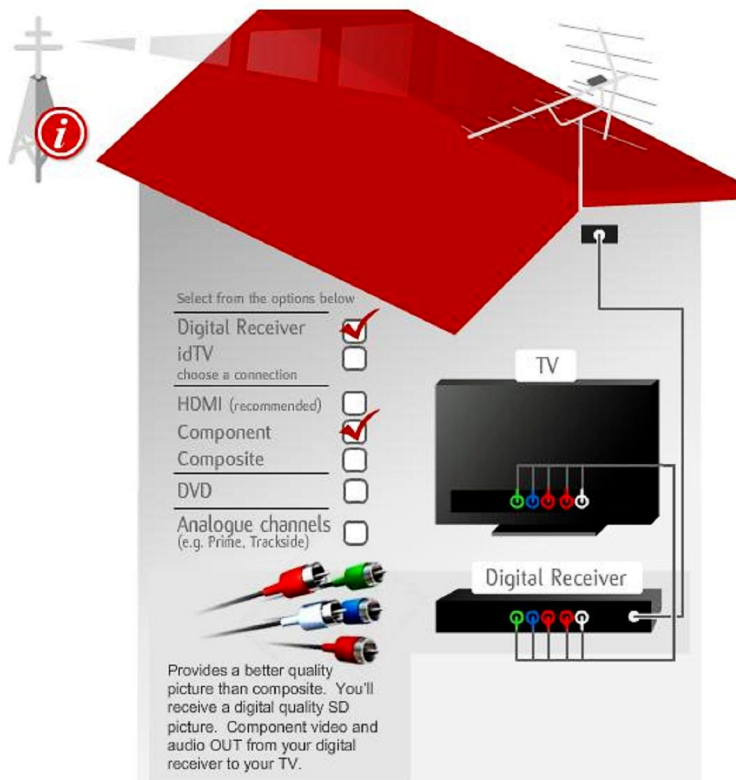

This is the recommended set up.

Option 2: Composite

Option 3: Component

Step 2: Initial Installation

Once the **TEAC HD-B6T** is connected, turn the power on. The receiver will take about 30 seconds to start up. The initial installation screen will show.

Select Yes to auto scan

Step 3: Tuning

Your receiver will automatically scan for channels (should take up to 5mins): Once complete press okay to save and exit out of menu

Once tuning is complete, the receiver will begin showing the first channel.

And that's it! You're ready to watch Freeview | HD™! If you have any problems we recommend you check your aerial connection. If you still can't get a picture one of the installers listed in the installer directory on our website should be able to help.
